Programming
C++, C, Java, Go, TypeScript, Python

Backend
Spring Boot, Go, NestJS, ExpressJS

Tools
Git, Docker, Linux/Unix, Jira, Notion

Databases
Postgres, Prisma

Frontend
Vue.Js, React.js, Next.js

INTERESTS

Sport: Climbing, Football, Badminton

Video games

Cinema

Travel

Summary

5th-year student at Epitech, looking for an end-of-studies internship in software engineering, as close as possible to connected devices and embedded systems.

I have built backends, APIs and microservices, and I am interested in software architecture, connected devices and IoT.

I have worked on several technical projects, including from scratch, both independently and in teams, and internationally (Seoul).

Experience

Konversational — Part-time (Mon - Wed) - Nantes, France
Intern - ServiceNow Platform (CSM) — 10/2026 – 02/2027
- Training on the ServiceNow platform (CSM), ahead of internal tooling missions

La Trace — Seoul, South Korea
Freelance Fullstack Developer — 11/2025 – 03/2026
- Industrialized POCs into a production backend that aggregates, stores and synchronizes data from several external APIs
- Developed the endpoints exposing the data for a map display

Bouygues Telecom — Nantes, France
Fullstack Developer Intern - Cross-functional IT team — 04/2025 – 08/2025
- Developed an internal GitLab repository analysis tool, backed by a database
- Built backend processing (data collection, analysis, cron jobs) for Bouygues Telecom's entire IT department
- Designed REST APIs exposing the processed data to internal teams

Epitech Nantes — Nantes, France
Regional Teaching Assistant — 01/2024 – 03/2025
- Provided pedagogical support to 50 to 70 students on development projects

SERAD — Teillé, France
Mobile Developer Intern — 09/2023 – 12/2023
- Maintained an existing Delphi application

Projects

Personal server (home lab) - TrueNAS — 08/2025
- Set up a storage server on an old laptop (TrueNAS) with services hosted in Docker containers (including Immich)
- Secure remote access through Tailscale, used remotely during my exchange in Korea
- In progress: power consumption monitoring and home automation (Home Assistant)

Melo - Music event recommendation platform — 03/2025 – Present
- Designed a microservices architecture with inter-service communication
- Developed a reverse proxy (requests, authentication, authorization)

Education

Epitech Nantes, 44100, France — Grande Ecole Program 2022 - 2027

Chung-Ang University Seoul, South Korea — Exchange year 2025 - 2026

Lycée Saint Joseph Ancenis-Saint-Géréon, France — Baccalaureate 2019 - 2022
