Skills

Programming Languages
C++, Go, Java, Typescript, Python, Dart

Backend
REST APIs, Microservices, Application Architecture, Business Logic Design

Tools
Git, Docker, Linux/Unix, Jira, Notion

Technical Stack

Backend
Golang, Springboot, NestJS, ExpressJs

Databases
Postgres, Prisma

Frontend
Vue.js, React.js, Next.js

Interests

Climbing, Soccer, Badminton

Video games

Cinema

Travel, Food & Culture

Description

Fifth-year computer science student at EPITECH, focusing on backend development and software design.

I am particularly interested in application architecture, business logic design, and API development.

Through academic and professional projects, I have worked on several backend systems built from scratch and I am looking for an internship where I can contribute to real-world software engineering challenges.

Experiences

La Trace Seoul, South Korea
Freelance Fullstack Developer November 2025 - March 2026

- Developed synchronization workflows between external APIs
- Implemented backend logic for data processing and integration
- Worked autonomously on complete features from development to deployment

Bouygues Telecom Nantes, France
Fullstack Developer Intern (Cross-functional IT Team) April 2025 - August 2025

- Developed an internal GitLab repository analysis platform
- Implemented backend data collection and processing workflows
- Designed REST APIs to expose processed data
- Contributed to a large-scale technical environment involving multiple teams

Epitech Nantes Nantes, France
Teaching Assistant January 2024 - March 2025

- Mentored students during project reviews and introductory sessions

SERAD Teillé, France
Mobile Software Developer Intern September 2023 - December 2023

- Maintained and improved an existing Delphi desktop application

Projects

Melo - Music Event Recommendation Platform March 2025 – Present
Final Year Project

- Designed and developed a backend application in Go from scratch
- Implemented a microservices architecture with inter-service communication
- Developed a reverse proxy handling authentication and request routing

Education

Epitech Nantes, France Master's Degree in Computer Science - 2022 - 2027

Chung Ang University Seoul, South Korea Exchange Semester - 2025 - 2026

Saint Joseph High School, Ancenis-Saint-Géréon, France 2019 à 2022
